Building & Infra Technology Club

Belgian technologies for Infrastructure & Building Projects
Dear Executive,

Project developers, architects and contractors all over the world are continually looking for suppliers that can provide innovative, high-quality and high-safety answers to the ever-increasing need for lower impact on the environment and more sustainable construction and infrastructure projects. Belgian-based companies offer just that, amazing the world with innovative concepts and solutions to solve concrete challenges in cities.

The Building & Infra Technology Club groups these strong players into a tight network that firmly places Belgian-based know-how in construction and infrastructure projects on the international scene and introduce them to international EPC’s, Architects & developers.

Thanks to our network, we foster and facilitate the networking and the sharing of experiences within our business ecosystem. If you are looking for a unique point of contact for innovative technologies, operating from the heart of Europe, you have found it.
Why you should get in touch with the Building & Infra Technology Club?

The Club serves as a single point of contact for project developers, EPC contractors and Architects to do business with experienced Belgium-based players providing a structured overview of solutions and project references.

The Club increases visibility and creates synergies for its members and aims to generate international business opportunities by organizing customer seminars, high-level network events and trade missions abroad.

The Club constitutes a unique executive business platform for its members by facilitating networking between them in Belgium and abroad.

“As architects, we strive to create innovative designs that aid society, advance technology and sustain the environment. Innovation and experimentation are essential in our work. At a recent meeting organized by the Building & Infra Technology Club, I had the opportunity to exchange about future trends and technologies in global architecture with some of Belgium’s top technology players in our fields.”

Rafael de La-Hoz’s firm
Middle long term plans to create complete new cities, upgrading roads, buildings, educational & health infrastructures, are all excellent opportunities for members of the Building & Infra Technology Club to get in direct contact with decision makers on the occasion of dedicated missions abroad. These meetings are very difficult to achieve and are possible thanks to Agoria.

Frans Hoorelbeke, Chairman at Daikin Europe

“The network activities set up by the Building & Infra Technology Club are an efficient tool to get directly in touch with the real decisionmakers in infrastructure and construction companies, the world over. A perfect door-opener!”

BDO’s Global Real Estate & Construction (REC) team focuses on your challenges across the world, bringing together our professional industry expertise in Audit, Accountancy, Tax and Advisory services with local market knowledge, allowing us to offer you an exceptional service across the BDO network in 158 countries and 68,000 professionals. Our Partners provide clear-cut technical advice which responds to commercial requirements and supports the implementation process. We provide financing structures and business case modelling to real estate, infrastructure, urban development and public private partnership projects. Interested in getting to know us and explore what we can achieve together? Please contact erik.vandenbroeck@bdo.be, fillip.verstraete@bdo.be or jean-francois.albala@bdo.be.
BNP Paribas Fortis, Belgian leader in banking services

With strong roots anchored in Belgium’s banking history, BNP Paribas Fortis supports its clients and employees in today’s changing world. We offer the Belgian market a comprehensive package of financial services for private individuals, the self-employed, professionals, SMEs and public organisations. We also provide wealthy individuals, corporations and public and financial institutions with custom solutions for which we can draw on BNP Paribas’ know-how and international network (presence in 73 countries, with more than 196,000 employees, including around 149,000 in Europe). BNP Paribas has positioned itself as a leading bank in the Eurozone and a prominent international banking institution. It has key positions in its three main activities: Domestic Markets, International Financial Services and Corporate & Institutional Banking, which serves two client franchises: corporate clients and institutional investors. The Group helps all its clients (individuals, community associations, entrepreneurs, SMEs, corporates and institutional clients) to realise their projects through solutions spanning financing, investment, savings and protection insurance.

BNP Paribas Fortis Corporate Banking

BNP Paribas Fortis Corporate Banking is a global provider of financial solutions to corporate and institutional clients. Coordinating with BNP Paribas Corporate & Institutional Banking with about 32,000 people in 57 countries across EMEA (Europe, Middle East and Africa), Asia-Pacific and the Americas, we are able to offer solutions tailored to all our clients across capital markets, securities services, financing, treasury and financial advisory.

Know-how at our clients’ fingertips

Working in partnership with our clients, we help provide a full range of solutions to meet their ongoing needs, including liquidity management (cash management, trade finance, forex) and structured finance. By linking financing needs and investment opportunities, our specialists act as a bridge between corporate and institutional clients. All the while following a stringent risk management policy that ensures we conform to industry regulations.

A leader in Sustainable Business

An innovative approach, designed to help you and the markets navigate the change in a socially responsible way. Accompanying you through the energy transition and the UN Sustainable Development Goals transformations means offering one of the most extensive and innovative range of financial services. In particular we play a leading role in the green bond market and have long standing expertise in renewables origination, carbon financing and sustainability equity-linked indices.

Credendo is a leading European credit insurance group active in all segments of trade credit insurance with tailor-made solutions. Credendo provides a range of products that cover risks worldwide: Belgian export credit agency services, whole turnover short-term credit insurance, single risk, excess of loss, top up, surety and reinsurance.

“Credendo enables us to do business in a very challenging environment in which we could not countenance certain risks” - CEO of a specialised process equipment company

Our core customers are exporters of goods and services, as well as industrial projects and works. Our role is to support them in covering the commercial and political risks to which they are exposed in their dealings with their domestic and foreign customers and to facilitate export financing. The same applies to investors who want to protect themselves against political risks abroad.

Turning uncertainties into opportunities.
