Dear Executive,

Belgium has always played and is still playing a leading and pioneering role when it comes to innovative banking products.

Belgium was the first country in the world to use standardized 12-digit bank account numbers with check digits and the first country to introduce a national clearing system. In addition, Belgium was also one of the first countries in the world to issue electronic identity cards to its citizens allowing for easy authentication and digital signing. Also, a good number of renowned financial organizations have their European or worldwide headquarters in Belgium (Swift, Euroclear, Mastercard, ...).

Indeed, numerous innovative banking solution providers in Belgium have paved the way for the global use of a wide range of state-of-the art IT applications. These companies are ready to help you achieve your targets through their unique solutions.

As a decision maker in a financial organization, you will find in this brochure useful profiles of companies - known for their ’delivery’ track record - who can help you realize your upcoming projects. Please feel free to contact them directly or via the Financial Services Technology Club.

Luc Vandergoten
Why you should get in touch with the Financial Services Technology Club?

The Club offers financial institutions, all over the world, a single point of contact to do business with leading Belgium-based ICT product developers and solution providers for the banking industry, by providing, among other things, a structured overview of solutions and project references.

For a company in stand alone modus, it’s impossible to meet the IT-directors of the 8 most important banks in only 3 days.

Tom Lambrecht - Sopra Banking Software
“Once a year, the major banks in Belgium, present their vision on current and future ICT needs to the members of the Financial Services Technology Club. Those meetings take place in a relax, confidential but professional atmosphere. Taking the floor at these dynamic sessions, I can only emphasize that this kind of open dialogues drives the industry forward.”

Frank Stockx - Managing Director at
ING Belgium

“Receiving the Financial Services Technology Club delegation at FNB’s premises, allowed us to quickly assess which companies offer potentially interesting services for our specific needs. At the same time we could inform the Club members, as one of the largest Retail Banks in South Africa, on how the banking landscape in South Africa is organized. This made for an excellent win-win situation.”

Raj Makanjee - CIO of First National Bank
- South Africa
