WERELDWIJD INNOVEREN MET DE INDUSTRIËLE POMPEN VAN PACKO PUMPS

In ontelbare sectoren wordt de productie aangestuurd door pompen die naargelang de toepassing andere eigenschappen hebben. De voedselverwerkende industrie, bijvoorbeeld, stelt hogere eisen op vlak van reinigbaarheid dan pakweg de bio-ethanol of textielindustrie. En melkproducten vragen weer andere specificaties dan aardappelen of bier.

Of het nu gaat over klassieke markten en toepassingen of over nieuwe en sterk groeiende markten, zoals die van hernieuwbare energie en biogassen, Packo Pumps kan voor elk van deze uitdagingen een standaard of een op maat gemaakt product aanbieden.

Groeien zonder fileleed in Diksmuide

Packo Pumps, onderdeel van Packo Inox nv, is gevestigd in Diksmuide, op veilige afstand van de grote verkeersproblemen en met de ruimte om te groeien. Want groeien is wat Packo Pumps nu al 15 jaar lang onafgebroken doet. Het aantal medewerkers is in die tijd verdubbeld en de fabriek wordt uitgebreid met maar liefst 1440 m².

Het opleidingsniveau van de gemiddelde Packo medewerker ligt minstens op bachelor niveau en de omzet stijgt jaarlijks met ongeveer 10%. In 2014 vonden ruim 8000 industriële pompen de weg van Diksmuide naar hun eindbestemming, ergens in de wereld. Daarvan was meer dan 60% bestemd voor de voedingsmiddelenindustrie.

Innovatie via cross fertilisatie

Het bedrijf in Diksmuide bestaat uit drie afdelingen: industriële pompen, melkmachinecomponenten en oppervlaktebehandeling. Elk van die afdelingen is cruciaal en zorgt voor een unieke toegevoegde waarde bij de fabricatie en ontwikkeling van nieuwe producten. Want Packo Pumps ontwikkelt continu. Nieuwe toepassingen, nieuwe markten, nieuwe landen worden aangesproken. De knowhow en ervaring die in de ene markt wordt opgebouwd is vaak cruciaal voor innovaties in een andere markt. Die interdisciplinaire focus en de wil om voortdurend te verbeteren, is diep ingebed in het bedrijf. Het is tevens dé grote motiverende kracht voor jonge, ambitieuze medewerkers.

Focus zorgt voor wereldwijde expansie

In 2015 werden in het eerste half jaar al een drietal innovaties geïntroduceerd. Eén daarvan is een pomp die beantwoordt aan de eisen van de industrie om grotere volumes te verpompen. De nieuwe 'big one' van Packo heeft een capaciteit tot 1250 m³/h en is met 132 kW de krachtigste. Dankzij de focus van Packo Pumps op het ontwerp en de productie van pompen heeft het bedrijf zich internationaal op de kaart gezet. De vraag naar de kwalitatieve oplossingen en de duurzaamheid van Packo pompen komt uit de hele wereld. Packo Pumps kent dan ook een gestage opmars in de nieuwe groeielanden.

AGORIA, THE TECHNOLOGY INDUSTRY ASSOCIATION

1,700 companies in 10 fields of activity

Agoria brings together and defends the interests of all companies that manufacture and use technology. It is committed to the future of these companies and their 275,000 or so employees.

Agoria is a partner of over 1,700 companies (80 p.c. of which are SMEs) in 10 fields of activity, namely Information and Communication Technologies (ICT), Building Technologies, Contracting, Materials Technology, Subcontracting, Production Technology & Mechatronics, Transport Systems & Solutions, Energy Systems & Solutions, Environment Systems & Solutions, Aeronautic, Space, Security, Defence Technology.

BELGIAN COMPRESSORS, PUMPS, VACUUM TECHNOLOGY AND VALVES

ABOUT THIS GUIDE

This guide provides a practical overview of the market orientation of the Belgian providers of compressors, pumps, vacuum technology and valves. It offers an overview of their exposure to the different industries. The categorization of companies with respect to their product portfolio should help readers to find their way. The second part of the guide provides further details & contact info on the companies participating in this guide.

This introduction highlights the main trends with respect to the design of compressors, pumps and valves.

COMPRESSORS & VACUUM TECHNOLOGY

As Europe is gearing up to achieve its ambitious but necessary goals on reduction of greenhouse gasses, the Belgian compressor industry is making important progress on the eco-design of its products. Reduced energy efficiency is achieved through more energy efficient drive trains (IE 2, IE3 motors) and better control of the drive trains via extensive use of VSD. Also, new compressors are getting more compact through improved design of the drive train and integration of VSD and transmission into one shaft. Increased energy efficiency also comes via better production techniques that allow for smaller tolerances

on the critical components of the compressor. Also, continuous progress is made in the cooling systems and increased possibilities are developing for heat recuperation.

PUMPS

As for compressors, the Belgian pump industry is moving forward with the ecodesign of its solutions. Fundamental trends similar to those in the compressor industry, drive the pump industry forward. The integration of IE2 and IE3 electro motors combined with VSD explain for significant progress on the energy efficiency. But also the mechanical design of pumps is developing to reduce friction and abrasion such that higher hydraulic efficiency levels are achieved. The Belgian industry is already ahead of the new European legislation on energy efficiency of pumps (EC 547/2012 and EC 622/2012). Currently, the industry is working on methods to measure and reduce the resource consumption (environmental footprint) of its products throughout the product life cycle.

VALVES

The world of valves is very wide. Valves are developed for the oil & gas industry, hydraulics, pneumatics, process industry ... Valves find their way into semiconductor industry but also in carpet weaving machines. Some segments are conservative and focus on cost, other segments are more demanding and require the valve industry to push ahead. Examples of that progress are the developments of membrane or diaphragm valves. Mechanical design, material selection, coatings, actuation are all dimensions on which progress is made. Also new valve designs are being developed such as C-rex type trunnion mounted double eccentric ball valves that guarantee perfect closure in tough conditions. New control and actuation technology allow more precise control of valves. Mechanical design, material selection and coatings, reduce friction and abrasion such that mean time between failure increases. Also intelligent design of installation kits, make the inclusion of valves in existing pipe networks easier.

Atlas Copco

>>www.atlascopco.be

Contact: Nadine Legrand - bga.info@be.atlascopco.com

Brusselsesteenweg 346, 3090 Overijse

T: +32 2 689 05 11

Atlas Copco is a world-leading provider of sustainable productivity solutions. The Group serves customers with innovative compressors, vacuum solutions and air treatment systems, construction and mining equipment, power tools and assembly systems. Atlas Copco develops products and service focused on productivity, energy efficiency, safety and ergonomics. The company was founded in 1873, is based in Stockholm, Sweden, and has a global reach spanning more than 180 countries. In 2014, Atlas Copco had revenues of BSEK 94 (BEUR 10.3) and more than 44,000 employees. Learn more at www.atlascopco.com

Belven, NV

>>www.belven.com

Contact: Geert Van Mechelen - info@belven.com

Blokhuisstraat 24, 2800 Mechelen

T: +32 15 29 40 70

Belven is the global preferred valvepartner. Belven is specialized in the production and sale of quarter-turn shut-off valves for low and medium-high pressures for use in water and chemical fluid applications. You can find the Belven products in industrial markets as HVAC (heating, ventilation, airconditioning), refineries, tank storage, (petro-)chemical and pharmaceutical sector, pulp and paper industry, waste water treatment, desalination, water purification, drinking water supplies. The Belven headquarters are located in Belgium and organize all activities related to the flow of the product: from research and development till installation. Throughout an extensive world-wide network of agents and distributors Belven delivers its products to the local market. Being a family business, core values as trust and reliability are the main drivers of the operations. Belven is hence proud to be... more than inv(a)lved.

Clasal, NV

>>www.clasal.be

Contact: Johan Claeys - johan.claeys@clasal.be

Ruddervoordsestraat 82, 8210 Zedelgem

T: +32 50 27 82 53

Clasal is a reliable manufacturer of piston pumps for more than 50 years. We offer a full range of piston pumps for various applications. The Diana and Hercules piston pumps are used as a hydrophore in houses and on farms. We have a range of dewatering piston pumps with a capacity up to 100 m³/h. In 2015 Clasal acquired the Geho ZD piston pump business. These pumps are known as the best dewatering pumps.

Cobepex, SA

Ensival Moret Belgium

>>www.ensival-moret.com

Contact: Denis Boudailliez - info@em-pumps.com

Bois-la-Dame 4, 4890 Thimister-Clermont

T: + 32 87 46 81 11

With a hundred-year experience in the design and manufacturing of industrial pumps, Ensival Moret is a world-famous supplier whose know-how is internationally recognised. Renowned for its reliable technical solutions and high quality products, Ensival Moret supplies a wide range of industrial pumps for meeting all industrial requirements, even the most specific ones with difficult pumping conditions. Ensival Moret offers a complete range of centrifugal and mixed flow pumps for a capacity up to 30.000 m³/h with operating temperatures from -160°C to +900°C. This product range also includes a series of self-priming pumps, liquid ring vacuum pumps, high capacity submersible pumps and canned motor pumps. A wide choice of material is available. In 2012 MPR Industries became a subsidiary of Ensival Moret, thus entering the Pumps Division of the Moret Industries Group. Within the Ensival Moret Division, MPR Industries is in charge of supplying air and gas handling solutions. With a volumetric technology using sliding vane or liquid ring, MPR Industries offers a complete range of compressors and vacuum pumps which can reach flows up to 22,000 m³/h (97,000 USgpm)

Eurosealings, NV

Flowserve Belgium

>>www.flowserve.com

Contact: Filip Douwen - FDouwen@flowserve.com

Göteborgsweg 6 - Haven 328, 2030 Antwerpen 3

T: +32 475 80 85 08

Flowserve Corporation is a public, multi-national company engaged in the engineering, manufacturing and servicing of advanced technology fluid handling and control equipment in a variety of markets worldwide. The products of the company include pumps, valves, mechanical seals and related services. The markets served include petroleum, power (nuclear & fossil), chemical processing and other general industry services where the movement and control of fluids are critical. Customers are both in the public and private sectors. The Flow Solutions Group is responsible for sales, engineering, manufacturing, assembly and testing of centrifugal pumps and pump packages to mainly the petrochemical and chemical industry.

François (Ateliers), SA-NV

No-Leak, NV

>>www.no-leak.be

Contact: Jaak Kerkhofs - j.kerkhofs@no-leak.be

Industrieweg 8, 2280 Grobbendonk

T: +32 14 51 16 29

Production (hot forging) of valves and other articles in brass.

Packo Inox, NV

>>www.packopumps.com

Contact: Bart Van Bastelaere - bart.vanbastelaere@packo.com

Cardijnlaan 10, 8600 Diksmuide

T: +32 51 51 92 80

Starting in 1975, Packo Pumps has designed and constructed stainless steel pumps for various industries. Since this date, we have supplied more than 300.000 pumps and these for the most diverse applications. The first pumps that were developed by us were destined for the dairy industry, so from the outset hygiene and cleanability were a basic requirement for Packo Pumps. The use of stainless steel and the standard applying of an electrochemical surface treatment (electropolishing), find their origin here. These are two factors that make Packo pumps stand out even today. Diversification and deepening of knowledge have led to Packo Pumps being a market leader in various sectors today.

REM-B HYDRAULICS, NV

>>www.remb.be

Contact: Paul Vermeiren - paul.vermeiren@remb.be

Rouwbergskens 5, 2340 Beerse

T: +32 475 58 72 29

Specialized in Hydraulic Repair, Hydraulic Service, Engineering of Hydraulic projects and sales of Hydraulic components and spare parts.

Robinetterie RVB, SA

>>www.rvb.be

Contact: A. Gillieaux - info@rvb.be

Boulevard Industriel 137, 1070 Bruxelles

T: +32 2 376 00 30

rvb® is a Belgian manufacturer of luxury bathroom and kitchen faucets. Since 1935 we design and produce high quality faucets in our Brussels Factory. We have been collaborating with several designers through the years to propose the most innovating product and to satisfy our clients.

Furthermore, we are also known in the professional world for our range of taps designed for use in hospitals and public/private organisations.

Saint-Gobain Pipe Systems Belgium, SA-NV

>>www.sgps.be

Contact: Philippe Martinelle - sgps-be@saint-gobain.com

Rue des Nouvelles Technologies 29, 4460 Grâce-Hollogne

T: +32 11 88 01 20

SAINT-GOBAIN PIPE SYSTEMS Belgium is part of the SAINT-GOBAIN group, the world leader in sustainable habitat. Supported by a strong awareness of brands like ISOVER, PAM, WEBER, GYPROC, NORTON, Jewson, Point P, Lapeyre, Brossette ... SAINT-GOBAIN is considered as the reference of Habitat and industrial applications markets.

By focusing on the water sector, SAINT-GOBAIN PIPE SYSTEMS Belgium provides a full range of products and services related to potable, waste and industrial water. Specialized in ductile iron solutions, we can provide a complete network: pipe, fittings, municipal castings, ... with a clear expertise in valves: gate valves, butterfly valves, regulation valves, brass & composite valves, pneumatic, etc.

Sanha Fittings, BVBA

>>www.sanha.com

Contact: Peter Impens - peter.impens@sanha.com

Industrielaan 7, 1740 Ternat

T: +32 471 66 24 94

Innovative technology, uncompromising quality and comprehensive service characterise SANHA's connecting technology. With four of our own factories and a certified quality management system, SANHA offers complete solutions from production to delivery. The range starts from conventional soldered, threaded and welded fittings of copper, stainless steel, red brass, lead free Siliconbronze or malleable cast iron up to fully developed push and press systems for metal and plastic pipes. Water, gas, heating, solar, compressed air and industrial applications: SANHA provides the most solutions for any installation!

SPX Flow Technology Belgium, NV

>>www.spx.com

Contact: Dirk Demarre - dirk.demarre@spx.com

Evenbroekveld 2-6, 9420 Erpe-Mere

T: +32 495 22 52 36

SPX provide You with a large range of Centrifugal and Positive Displacement pumps. We also have a strong service departement to support you if needed.

Sterling SIHI (Belgium), BVBA

Victaulic Europe, BVBA

>>www.victaulic.com

Contact: Peter Van Mol - viceuro@victaulic.com

Prijkelstraat 36, 9810 Nazareth

T: +32 473 69 59 22

Since 1919, Victaulic has been world's leading producer of grooved mechanical couplings and pipe-joining systems. Used in the most demanding markets, Victaulic innovative piping technologies put people to work faster while increasing safety, ensuring reliability and maximizing efficiency. The company has over 15 major manufacturing facilities, 28 branches worldwide and over 3600 employees who speak 43 languages across the globe. With more than 1900 active global patents, Victaulic solutions at work in 115 countries across diverse business lines including oil and gas, chemical, mining, power generation, water and waste water treatment, military and marine, as well as commercial buildings and fire protection.

Xylem Water Solutions Belgium, BVBA

>>www.xyleminc.com/be

Contact: Kris De Meester - kris.de.meester@xyleminc.com

Vierwinden 5B, 1930 Zaventem

T: +32 2 712 40 27

Xylem offers a complete range of water handling, extraction, transport, distribution, wastewater and process treatment applications across commercial, industrial and municipal market. With reliable and efficient products working in countless installations worldwide, we provide durable and custom designed solutions.

ELMA
MAKES MEDIA
PROFITABLE

Targeted ads?

1. Cut out on the dotted line
2. Turn 180°

Elma Multimedia publishes business-to-business media in close collaboration with branch and professional associations. We link the information needs of the coordinating organizations and their members to the advertisers' needs. The result is a specialized, high value-added publication. This way Elma creates a meeting point for both customer and supplier. If you want to change "me" in "we", contact us by the data below. We are pleased to help you.
